Not created or cracked by me. Download Minecraft PE 1.5.2 Update Aquatic for free on Android: adorable reptiles and their babies, fragile eggs, as well as a variety of achievements. What's new in MCPE 1.5.2? Developers release another Update Aquatic version introducing bubble columns, trident enchantments, and even underwater conduit. Minecraft PE 1.5.2 players will be able to explore brand new oceans. Items First of all, the freshly added trident now has its own witcheries. It turns out this powerful weapon can be even more efficacious. Rummage all the chests you can find or rip off all the greedy traders on your way to find the Loyalty, Channeling, Impaling, and Riptide. Once thrown at someone not so friendly and enchanted with Loyalty, tridents will fly back to the MCPE 1.5.2 users. On the other hand, the Channeling effect allows you to summon lightning by throwing it. You can technically become Zeus. The Riptide charm propels the player if he uses the trident underwater or when it's raining. Additionally, it deals some damage to the mobs in your propelling way. Lastly, the Impaling enchantment maltreats marine creatures more than usual in Minecraft PE 1.5.2. Mobs Some animals changed a little as well. For instance, you can now feed dolphins raw cod or salmon, so it leads you to the nearest shipwreck or ocean ruins. Oppositely, Drowned now have more chances to spawn with a nautilus shell in MCPE 1.5.2. They still drop tridents sometimes, though. At the same time, Husks and Zombies now turn into Drowned if they spend too much time underwater. Generally, all undead can no longer swim at all. Generation When it comes to Minecraft PE 1.5.2 geography, we have to mention numerous bubble columns throughout the oceans. As a matter of fact, a magma or soul sand block placed in water depths now produces bubbles that can either suck you down or, on the contrary, push you to the surface. All in all, there is a lot to explore in this update. Unblocked games are io and HTML games that you can play over your school or work network. Schools and businesses use firewalls to block or blacklist gaming websites, allowing students and employees to concentrate only on their education and professions. On the other hand, these websites allow you to circumvent the restrictions. They must, however, be used in your spare time and in between periods of job or study. It's better to avoid playing them during the hours when the institute needs you to be entirely concentrated. These games are easily found by simply searching them. The majority of them can be found at sites.google.com. As a result, you won't have any difficulty locating them. Minecraft. Minecraft Classic is a free online version of the popular sandbox building game Minecraft. It is a recreation of the original Minecraft released by the developer Mojang to commemorate the game's tenth anniversary. Players can create in creative mode with the 32 available blocks in the game. You can play with up to 8 friends in multiplayer mode. Minecraft was first made available to the general public on May 17, 2009. It is now available in the same state as when it was first released. This means you can only construct with 32 bricks, and all of the original issues are still present! If you're used to the most recent version, seeing how the game has changed can be shocking. Unblock-US (opens in new tab) is not a typical VPN (opens in new tab) service. Instead, it routes your DNS queries through its servers, changing your location based on the sites you visit. This allows you to access any type of blocked content, without any buffering or throttling.If such a platform won't work for you and you're looking for a full VPN with all its advantages, then we strongly advise you to consider one of the best VPN (opens in new tab) solutions.PriceThere are two subscription plans on the table: monthly and annual. The former will set you back by \$4.99/month, while the annual includes a \$10 discount and costs \$49.90/year (equal to \$4.16/month).This is a bit expensive considering we are not talking about a full VPN service here - and Unblock-US can only be connected on one device at a time.If you don't think Unblock-US is the right choice for you, the provider offers a one-week free trial, no credit card required. Full refunds are also issued to users who cancel their annual subscription within the first thirty days after the purchase.A full VPN service can provide all the features Unblock-US doesn't, especially a top-of-the-range offering like ExpressVPN (opens in new tab), NordVPN (opens in new tab), CyberGhost (opens in new tab) or Surfshark (opens in new tab).StreamingUnblock-US can provide access to the likes of Netflix, Hulu, BBC iPlayer, Amazon Prime Video, and other streaming services that might be unavailable in certain regions due to geographical restrictions.(Image credit: Future)About the companyUnblock-US is owned by the company NetProtect Ltd, headquartered in Nicosia, Cyprus. It operates with the help of 100 servers in 17 countries.Privacy and encryptionTo provide you with access to all sorts of content on the internet privately, Unblock-US uses its SmartVPN. Unlike its SmartDNS technology, where it deploys a proxy to conceal the source of your IP address to the domains that request it, SmartVPN adds a layer of security to your connection.However, it doesn't encrypt user data, but "simply seals the contents of your data for transport so that the information within cannot be tampered with. That means no more snooping on your DNS traffic by your cellular carrier, and no more spying on behalf of Google".We were surprised to see that the provider's website didn't have an HTTPS certificate and it asked us to disable our ad-blocker, which isn't very encouraging in terms of security. That said, at least its sign-up page, where you leave your personal information, is secure and protected by Trustwave's Trusted Commerce program.The company claims in its Privacy Policy (opens in new tab) that it doesn't collect or log any traffic or use of its services, nor does it store "any of your data that passes through our servers, and we never manipulate the content you access." It adds that it doesn't "provide information that we do have unless we are legally required to".In other words, some data does seem to be collected and if an authority asks it to hand over any information about you, it will comply. But since Unblock-US states it doesn't collect any traffic data, sensitive information about your online activities should be safe.Unfortunately, we have no choice but to trust its word, because an external expert has not yet been brought in to verify the service's no-logging claims.SupportUnblock-US can be configured on all major computers and mobile devices, as well as various other devices, including Apple TV, PlayStation 4, Xbox One, Wii, Amazon Fire TV, routers, and so on.However, there are no native apps for its SmartVPN service, so you'll have to make do with third-party software like OpenVPN or Tunnelblick, which can be a bit confusing for a beginner.Setup guides are available on the website and they're very detailed. Besides the setup walkthroughs, Unblock-US' website also includes a support center with useful articles on various topics, such as billing, sites and channels, announcements, etc. If the website can't help with your problem, then you can contact human customer support via web form or phone.(Image credit: Future)Speed and experienceWe tested the download speeds of the provider's service and were quite pleased. Since Unblock-US doesn't route your traffic through any servers but just assigns you a new IP address, this means there were no losses in download or upload speeds during our testing. However, picking a server manually is impossible as the provider chooses the server closest to you automatically.Unfortunately, there are no native clients so if you're not used to such a system, you might feel overwhelmed and if you run into any problems, reading the log files might be overly complicated and confusing. Also, some may not be comfortable with tampering with their adapter options, which Unblock-US's DNS service requires.VerdictUnblock-US has some strong unblocking capabilities, but that's as far as it goes. It's not a full VPN platform, so you shouldn't expect any fancy privacy features and options, thousands of servers, nor full identity protection, as you would with the industry's greatest performers such as ExpressVPN (opens in new tab).It's great that Unblock-US offers a free trial and 30-day money-back guarantee but the lack of native apps makes it less appealing to beginners.
